# LABEL BASE LABELS

THE BASE TO MAKE YOUR EXISTING LABELS EASILY REMOVABLE.

## LABELLING OF REUSABLE PACKAGING

Many reusable transport packaging (e.g. plastic boxes) need to be re-labelled with up-to-date information. Typical labelling systems have significant disadvantages here:

- **Error scans** because of remains of outdated labels
- Significant **cleaning effort** to remove outdated labels
- The **appearance** of your transport packaging doesn't meet your company's quality standards.

### THE "LABEL BASE LABEL"

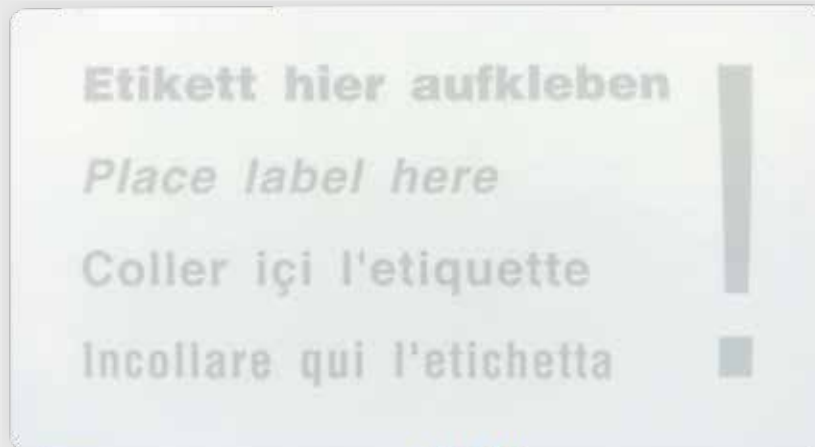

is the optimal solution with no need to change your existing labelling system:

- **Re-label often:** Your label can be removed **fast** and easily without residues, while new ones still stick safely and as often as you like.
- **Uniform presentation** as marking will occur in the same spot every time
- **Format and design according to your requirements:** "Label Base Labels" in custom formats or custom prints are available on request. Individualized imprint outlines the application location.
- **Self-adhesive:** Quick application of the place label is guaranteed based on its self-adhesive design. Secure adhesion of the place label on low energy substrates like plastic. Multiple adhesive choices are available for ensuring the best possible bond.
- Withstands **cleaning** processes
- **Sizes:** Standard sizes from DIN A8 to DIN A4. Custom formats are available on request.
- **Your advantages:** No cleaning effort, no mis-reads, uniform presentation, no adjustments in your current labelling system required.
