

Production consulting for your SMT production

Analysis. Workshop. Action plan.

In the initial module, we review your current SMT production together with your team:

Material and equipment preparation,
order workflows, machines and auxiliary equipment.

The findings are documented in an analysis report and a concrete action plan.

OUR ANALYSIS

Material and equipment
preparation

Order workflow and processing

OUR APPROACH

Analysis

Data collection and
assessment of existing
processes

Workshop

Develop improvements
together with your team

RESULTS AND NEXT STEPS

- ✓ Analysis report & action plan
- ✓ Production support during implementation
- ✓ Coordination of implementation
- ✓ Staff training
