

We keep your production running!

ADOPT^{SMT}

START Automatic Label and Tape Dispensers

- ✓ **Limits material waste**
- ✓ **Improved accuracy**
- ✓ **Speeds up application**
- ✓ **Programmable tape lengths**

ADOPT_{SMT}

zcM1000-Series

Electric Tape Dispensers

- **Ideal** for PCB masking
- **Customised models** available for every type of PCB masking tape
- **Programmable cut lengths:** 5mm (D model) to 999mm
- **Tape widths:** 7mm to 51mm
- **Cuts tape lengths:** 5mm to 999mm
- **Various accessories** available

ADOPT_{SMT}

LD6025

Electric Label Dispenser

- **Ideal** for tiny PCB barcode/QR code labels
- **Label width:** 6mm to 121mm
- **Label length:** 3mm to 152mm
- **Various** specifications and accessories available

ADOPT_{SMT}

TDA060

The New TDA060 Electric Tape Dispenser

- **Ideal** for PCB masking tapes
- **Programmable Memory** for up to 8 different cut lengths
- **Tape widths:** 5mm to 60mm
- **Cuts tape lengths:** 5mm to 999mm
- **Various** specifications and accessories available

The Entry Level to Automation

The perfect solution when full automation with expensive, dedicated machinery is not feasible or economically justified.

In SMT and electronics assembly, tape feeding, die-cut dispensing and labeling are not accessories — they are critical and delicate processes.

Especially when handling small labels and short tape pieces such as polyimide, where fine tolerances and sensitive materials are involved, precision and repeatability are essential.

That is why **AdoptSMT** relies on **START**, the world's leading manufacturer of electronic tape, and label dispensers. Local inventory, free material testing, service support, spare parts, and expertise. Send us your samples, and we'll test them on the dispenser we recommend for your application — then showcase the results in a custom video.

Let's talk

Contact the **AdoptSMT** team and let us help you define the right **START solution** for your tape, die-cut or labeling application.
