

KYZEN CLEANING SOLUTIONS FOR ELECTRONIC ASSEMBLIES

Aqueous cleaning for modern SMT and electronics processes

KYZEN offers aqueous and semi-aqueous cleaning solutions for a wide range of processes and contaminants. The products are designed for lead-free soldering processes, no-clean fluxes and sensitive electronic components.

Your benefits

High
cleaning performance

Good material
compatibility

For inline and batch
systems

For sensitive assemblies

Aqueous assembly cleaning

AQUANOX® A4625B (N)

Versatile solution for modern lead-free flux
residues

AQUANOX® A4727

Stable, environmentally friendly cleaner
with a consistent pH value

AQUANOX® A4241

Water-based, material-friendly and
also suitable for stencil cleaning

Immersion and ultrasonic cleaning
A4651US for ultrasonic baths •

MX2322 for semiconductor applications

KYZEN CLEANING SOLUTIONS FOR PRODUCTION & MAINTENANCE

**Stencil cleaning, equipment maintenance and
precision cleaning**

KYZEN offers specialised cleaners for printing stencils, underside cleaning and manual applications. Additional solutions are available for reflow ovens, wave soldering systems, solder frames and process tools.

Your benefits

Fast removal
of residues

Less maintenance time

Reduced machine
downtime

Improved production
performance

Stencil & maintenance cleaners

KYZEN® E5611 (N) / E5631J

For stencils, misprints and ready-to-use cleaning

CYBERSOLV® C8622

High-performance alternative to isopropyl
alcohol (IPA)

CYBERSOLV® C8508 / C8502

For reflow ovens, maintenance and conveyor
fingers in wave soldering systems

KYZEN® E5325 / CYBERSOLV® 141-X

For process tools, solder frames and manual
precision cleaning
